

## Viewing Procedure Counts

Follow the steps outlined below in order to view the procedure counts for your students.

1. From the left-side menu choose Students —> Daily Journal.

2. Select the student whose interaction you'd like to view. From the Action column choose "View".

3. Select the blue bar for the category of procedures you'd like to view (for example, "Critical Care"). Click on each section's blue bars to view entered totals to date.

4. You can also check a specific date to review entered data by selecting any item with data entered and then selecting the "Edit Count" button in the Action column.

5. On the next screen, you'll now see a calendar icon in the Action column. Select any item that has a date you wish to review, and then click on the calendar's "View Date" option to view everything entered for a specific date.

6. Although this is not the area where you typically go to view checkoffs, you can see items that have been checked off because they will appear here. Look in the "Evaluation Date" column and wherever a date appears you will know an associated checkoff has been completed.
