

Checking Summative Evaluations

To prepare you will need to check the clinical calendar/schedule to determine when evaluations are due as they will generally not be due every week and the schedule will vary depending upon your calendar for the term. Your primary goals are to determine if any evaluations are done, and if so, to evaluate them.

1. First, you'll want to see if there are any formative evaluations. To determine this, from the left-side menu choose Reports —> Advanced Reports.
2. From the "Reporting Style" dropdown, select "Summative". From the various dropdowns, select sorting criteria. Usually choosing dates for the week before will get good results. After you've chosen your criteria, press the "Details" button to get search results. In this case, I've found that only two students have had summative evaluations entered in the specified time period (one unsigned by the student), which means I only need to check those two— a huge time saver.

3. From the left-side menu choose Clinical —> Summative Eval.
4. Select the student who you'd like to check. Next, from the Action column, choose "View".
5. If this is not the student's first summative evaluation, you'd now select "View" from the Action column to view the one you wish to read.
6. Check that everything has been signed off on, what the scores are, and read any comments made by the student or clinical instructor. You will need to choose the 2nd blue bar titled "Summative Evaluation During Clinical Rotations" to read the complete evaluation.

This evaluation has some things I disagreed with, especially about taking responsibility
